JUNE 2013

Sturgeon Electric Colorado's Transmission & Distribution (T&D) and Commercial & Industrial Divisions STAR Status in OSHA's Voluntary Protection Program (VPP) Approved for 2013

Sturgeon Electric Company, Inc.'s (Sturgeon Electric) Colorado district, a subsidiary of MYR Group Inc. (MYR Group) is proud to announce its continuation of STAR status in OSHA's Voluntary Protection Program (VPP) Mobile Workforce Demonstration for Construction for 2013! Sturgeon Electric was initially awarded STAR status in the program in 2008, which it has continuously maintained year over year. STAR status is the highest VPP recognition level awarded by OSHA for workplace safety and health, and demonstrates Sturgeon Electric's commitment to lead the industry in occupational health and safety and continually advance initiatives to improve the lives of employees.

Initial award of STAR status in 2008

A few comments from this review process include:

"I can never comment enough about Sturgeon Electric's community efforts and awards. I hope the community understands the amount of worthwhile projects your management and employees have accomplished."

"Sturgeon Electric is moving in the right direction within the VPP model. Your 2012 evaluation clearly indicates an organization committed to safety and health excellence, and continuous improvement."

"Your management commitment to the VPP process is evident in several areas - from your weekly :60 Seconds for Safety employee newsletter to the inclusion of safety tips with paystubs are commendable techniques you are using to promote safety."

"Your success stories are wonderful to read and contain so many noteworthy goals and projects. It demonstrates the pride everyone as a whole has for Sturgeon Electric."

"Sturgeon Electric is a model company in the VPP construction field."
